OUR COMPANY

Space Needle
Seattle, Washington

From Garage to Global

The year was 1997. Jim "Doc" Mischel, Sr., a former dentist with the heart of an inventor, was spending time working on projects in the family garage. Jim Mischel, Jr., his son, had recently earned a law degree. With a flair for innovation and a knack for business, they decided to launch a new company, and Electric Mirror was born.

That garage is where the Mischel family turned out their first innovation, a high-end defogging mirror. In those days, family and workforce were one and the same, with parents Faith and Doc, and younger brother Aaron handling everything from sales and phones to manufacturing. Younger sister Mia, though still in school, was also kept in the picture.

Electric Mirror's innovative product lines expanded, and it wasn't long before demand outpaced the production capacity of the Mischel family home. Through the years, the company's rapid growth required expanding to ever-larger manufacturing facilities. As the company's footprint grew, so too did its reputation, earning it a significant amount of publicity and recognition along the way.

The Science of UV Clean

ELECTRIC MIRROR
IN GOD WE TRUST

"My family and I founded this company on the simple idea of offering the very best products, backed by the very best warranties, and supported by the very best team – and we've never wavered from that commitment."

- Jim Mischel, CEO

Today, Electric Mirror is the global leader in mirror and lighting technology. Its product lines have expanded to include lighted mirrors, polycarbonate mirrors, mirror TVs, TV covers, mirrored cabinets, makeup mirrors, wardrobe mirrors, and corridor lighting. Most recently, in response to the COVID pandemic, the company created a new division that uses UVC light to fight disease-causing viruses. This type of industry-leading ingenuity is evidenced by over 60 patents earned, with many other patents pending.

The company's global headquarters is in Everett, Washington, where it operates a 125,000 square foot domestic manufacturing facility that employs over 200 people. Electric Mirror also produces products through international contract manufacturing facilities.

Electric Mirror has earned a sterling reputation throughout the hospitality, commercial, healthcare, senior living, multi-family, and residential industries. Every day, millions of people across 100 countries delight in Electric Mirror products. And every day, more designers, architects, purchasers, and owners around the world are choosing Electric Mirror products – the best the world has to offer.

LEADERSHIP BY THE NUMBERS

1,500,000
People around the world who enjoy using Electric Mirror products every day

125,000
Square foot company headquarters and manufacturing facility in Everett, Washington

200
Employees dedicated to designing and building the most innovative mirror technology products on the market

100
Countries around the world where Electric Mirror products are used in hotels, commercial properties, and residences

65
Patents received for utility and design innovations, with another 50 pending

25
Industry awards recognizing Electric Mirror's leadership in product innovation and business success

10
Company departments focused on innovative leadership, including R&D, Engineering, Product Management, Quality, Manufacturing, Logistics, Sales, Marketing, Customer Service and Administration

6
Channels served, beginning in Hospitality, and growing to include Residential, Commercial, Multi-Family, Healthcare and Senior Living
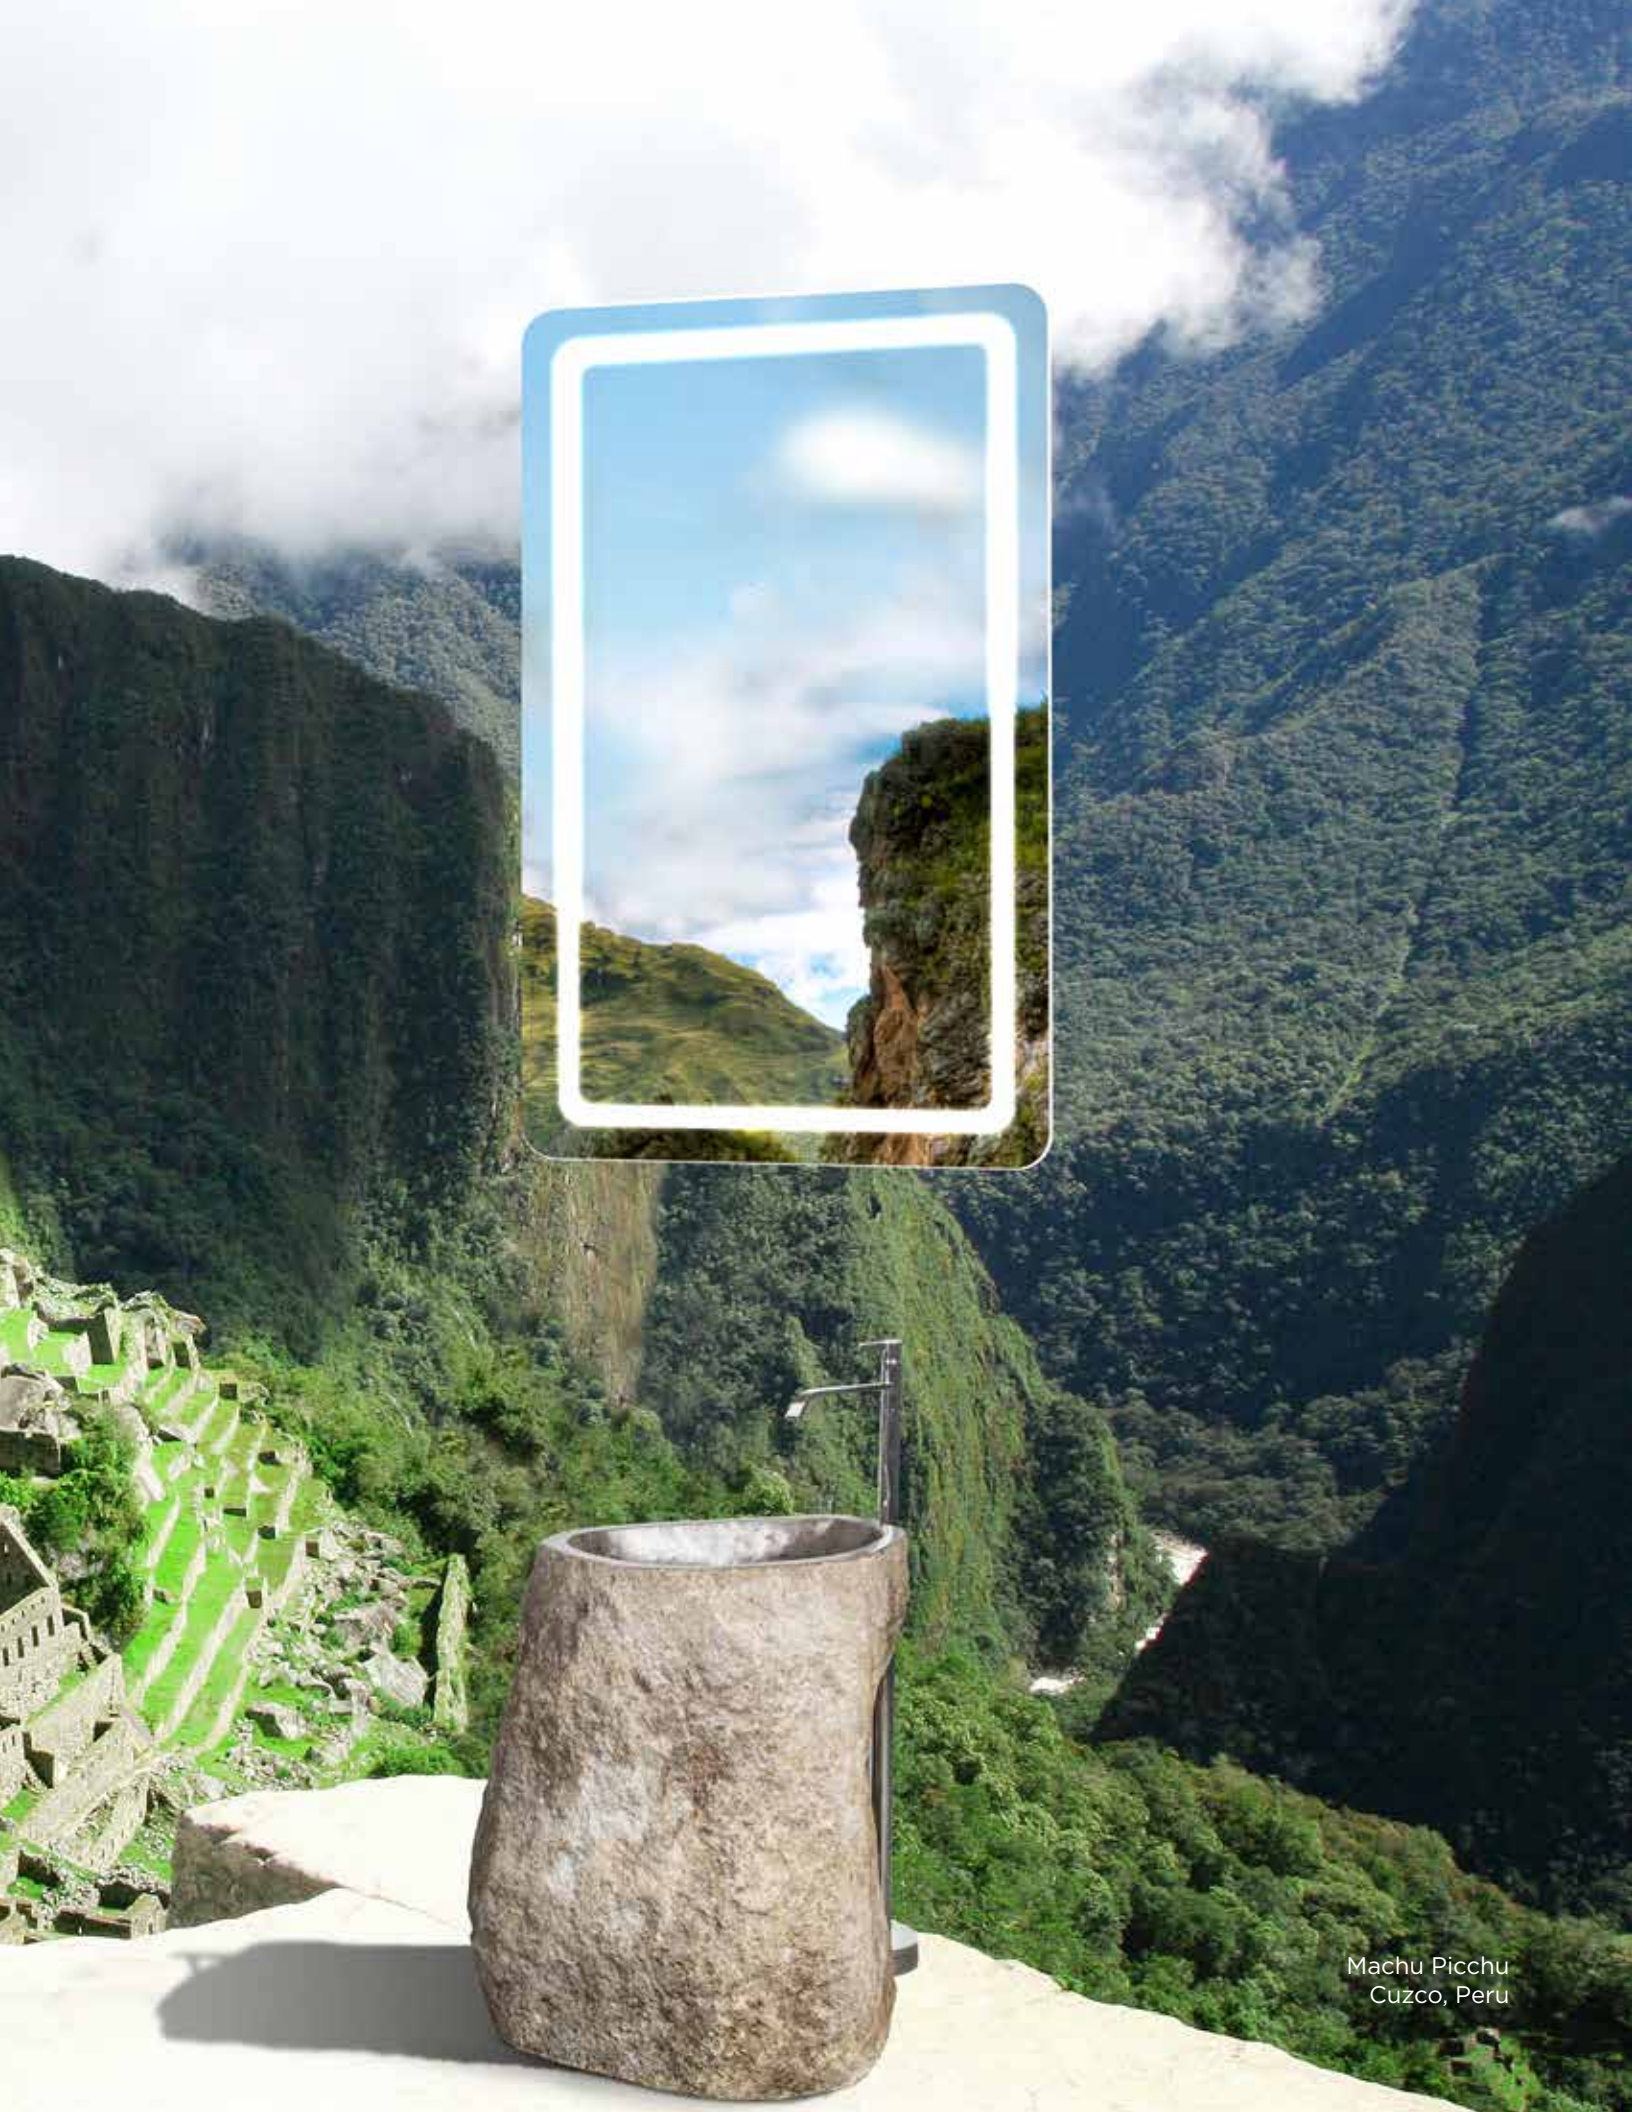

1
Common vision: To lead the industry by infusing mirror and technology with inspired design that captivates our customers

OUR COMMITMENT

Machu Picchu
Cuzco, Peru

Exceptional Style

that combines fashion, form, and function.

Electric Mirror products are as much a fashion statement as they are a representation of flawless functionality. Here, bold design strikes a balance with intelligent technology to create a mirrored centerpiece that unites dazzling aesthetics with twenty-first century style.
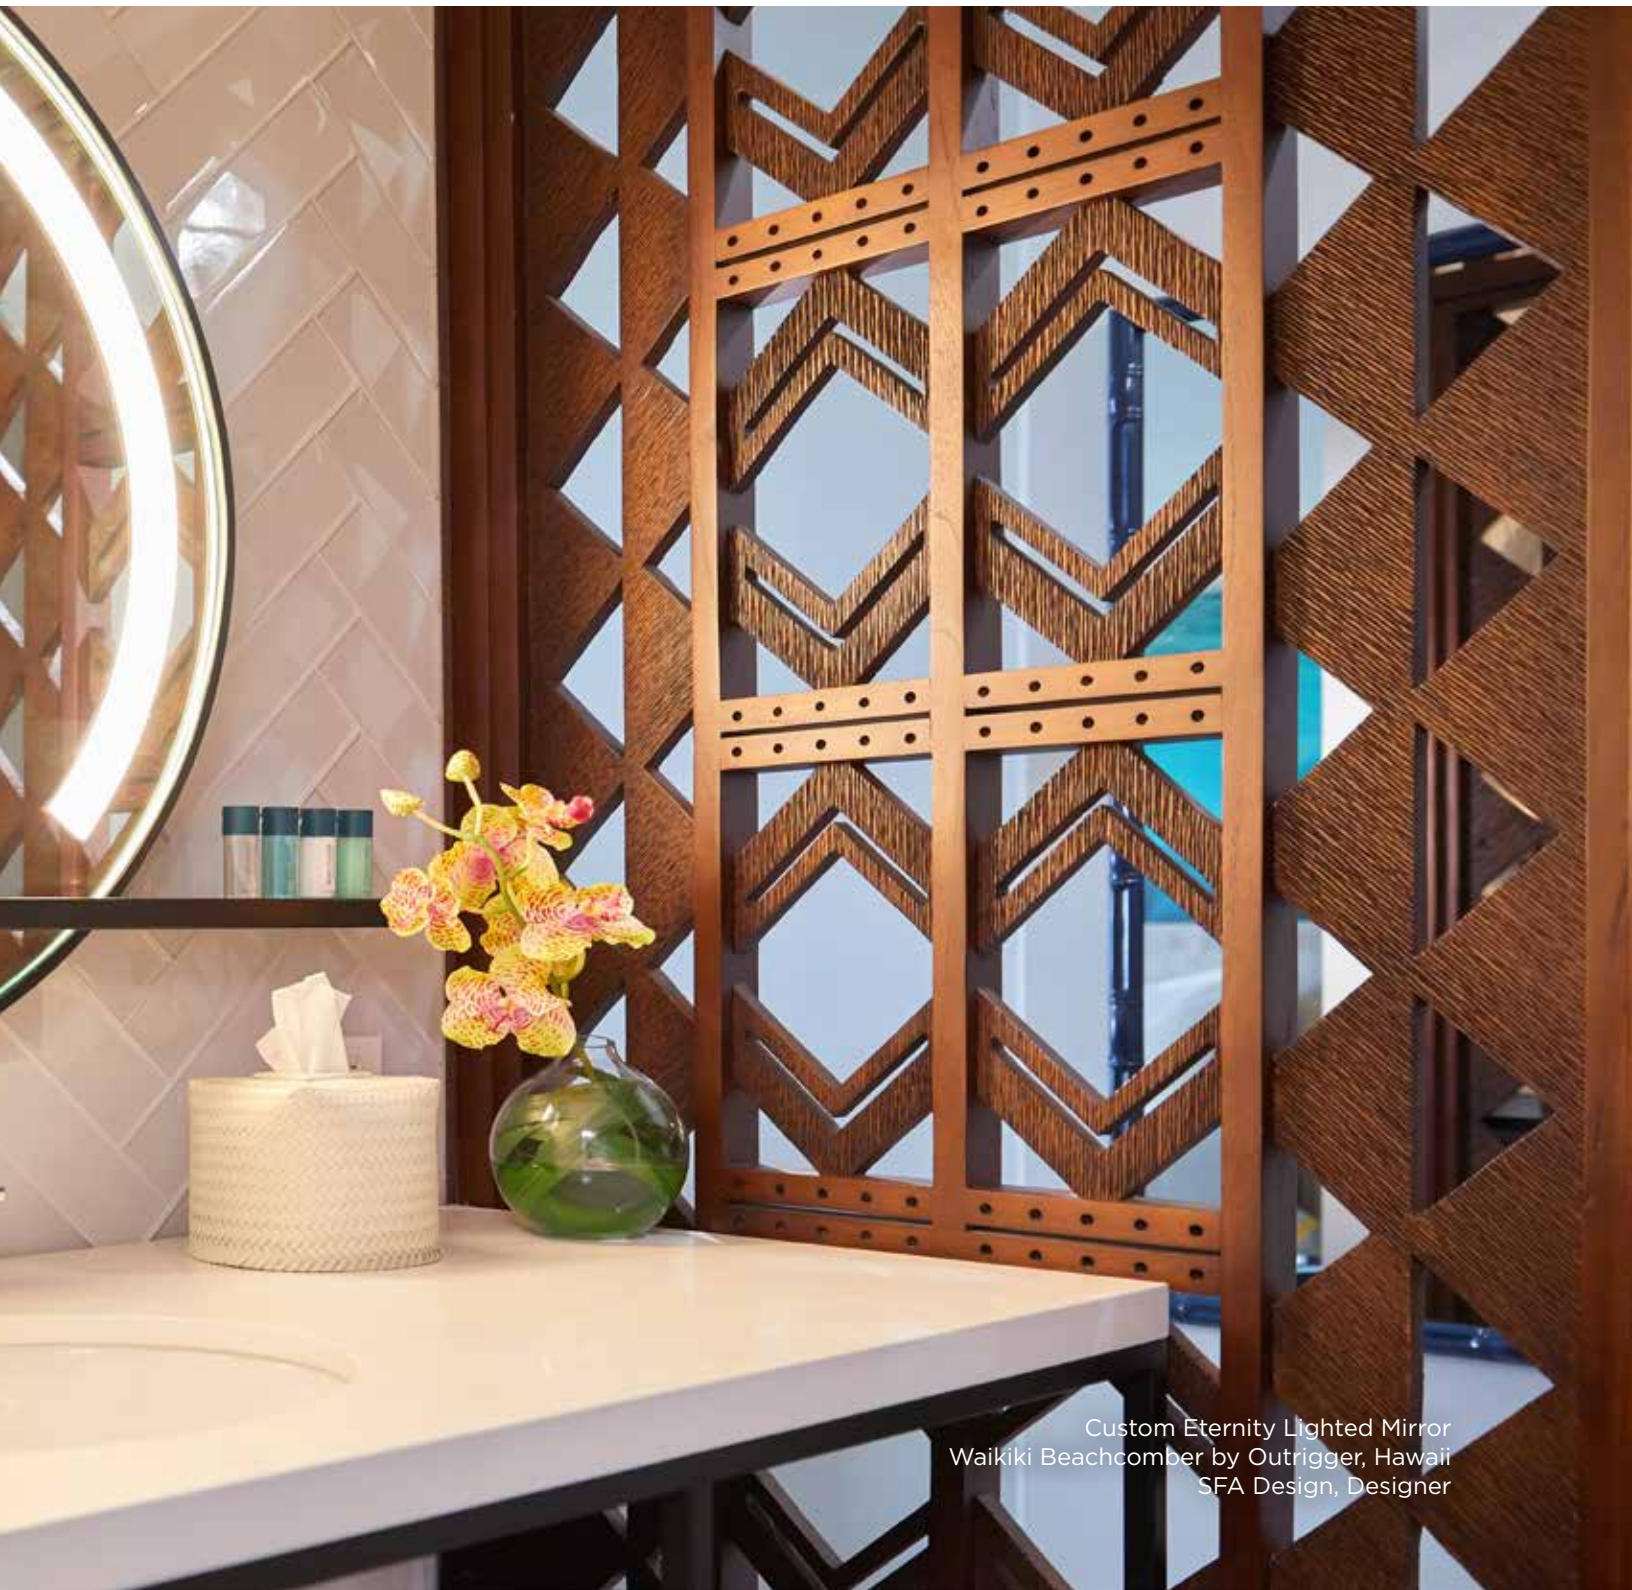

Custom Eternity Lighted Mirror
Waikiki Beachcomber by Outrigger, Hawaii
SFA Design, Designer

Innovative Technology

that sets the industry standard.

As the original architect of the lighted mirror industry, innovation has always been at the forefront of everything we do. From creating the first fog-free mirror, to incorporating TVs into lighted mirrors, to creating mirrors with embedded technology, we've earned an unequivocal reputation as the industry leader in ingenuity.

Custom Mirror TV
Four Seasons, Kuwait
Yabu Pushelberg, Designer

Unparalleled Value

that safeguards your investment.

Price is temporary, but value lasts forever. That's why Electric Mirror builds the highest-quality products, and designs them to last. With Electric Mirror, you get sophisticated engineering that ensures maintenance-free operation. Mirror that won't corrode or yellow with age. And a superior warranty backed by a U.S. customer support team. Combined, it means a total cost of ownership that provides the greatest return for your investment.

Custom Silhouette Lighted Mirror
Tulalip Resort Casino, Washington
IDI Studio, Designer

Worldwide Appeal

that elevates your projects' panache.

Custom Integrity Lighted Mirror
Le Royal Monceau, Paris
Philippe Starck, Designer

Beginning in hospitality, Electric Mirror products set the stage for a superior guest experience. As our reputation grew, so too did our expansion into other markets, including commercial, healthcare, multi-family, senior living, and residential. Today, we have more installations than all others combined, and our products are in high-demand for the most esteemed projects worldwide.

Unrivaled Satisfaction

that makes your decision easy.

No other name defines leadership, style, innovation, and value quite like Electric Mirror. From the beautiful and inspiring products we create, to the quality and integrity with which they're built, our mission is to produce products that we're proud to stand behind, and that you'll be proud to feature in your next project.

OUR CLIENTS
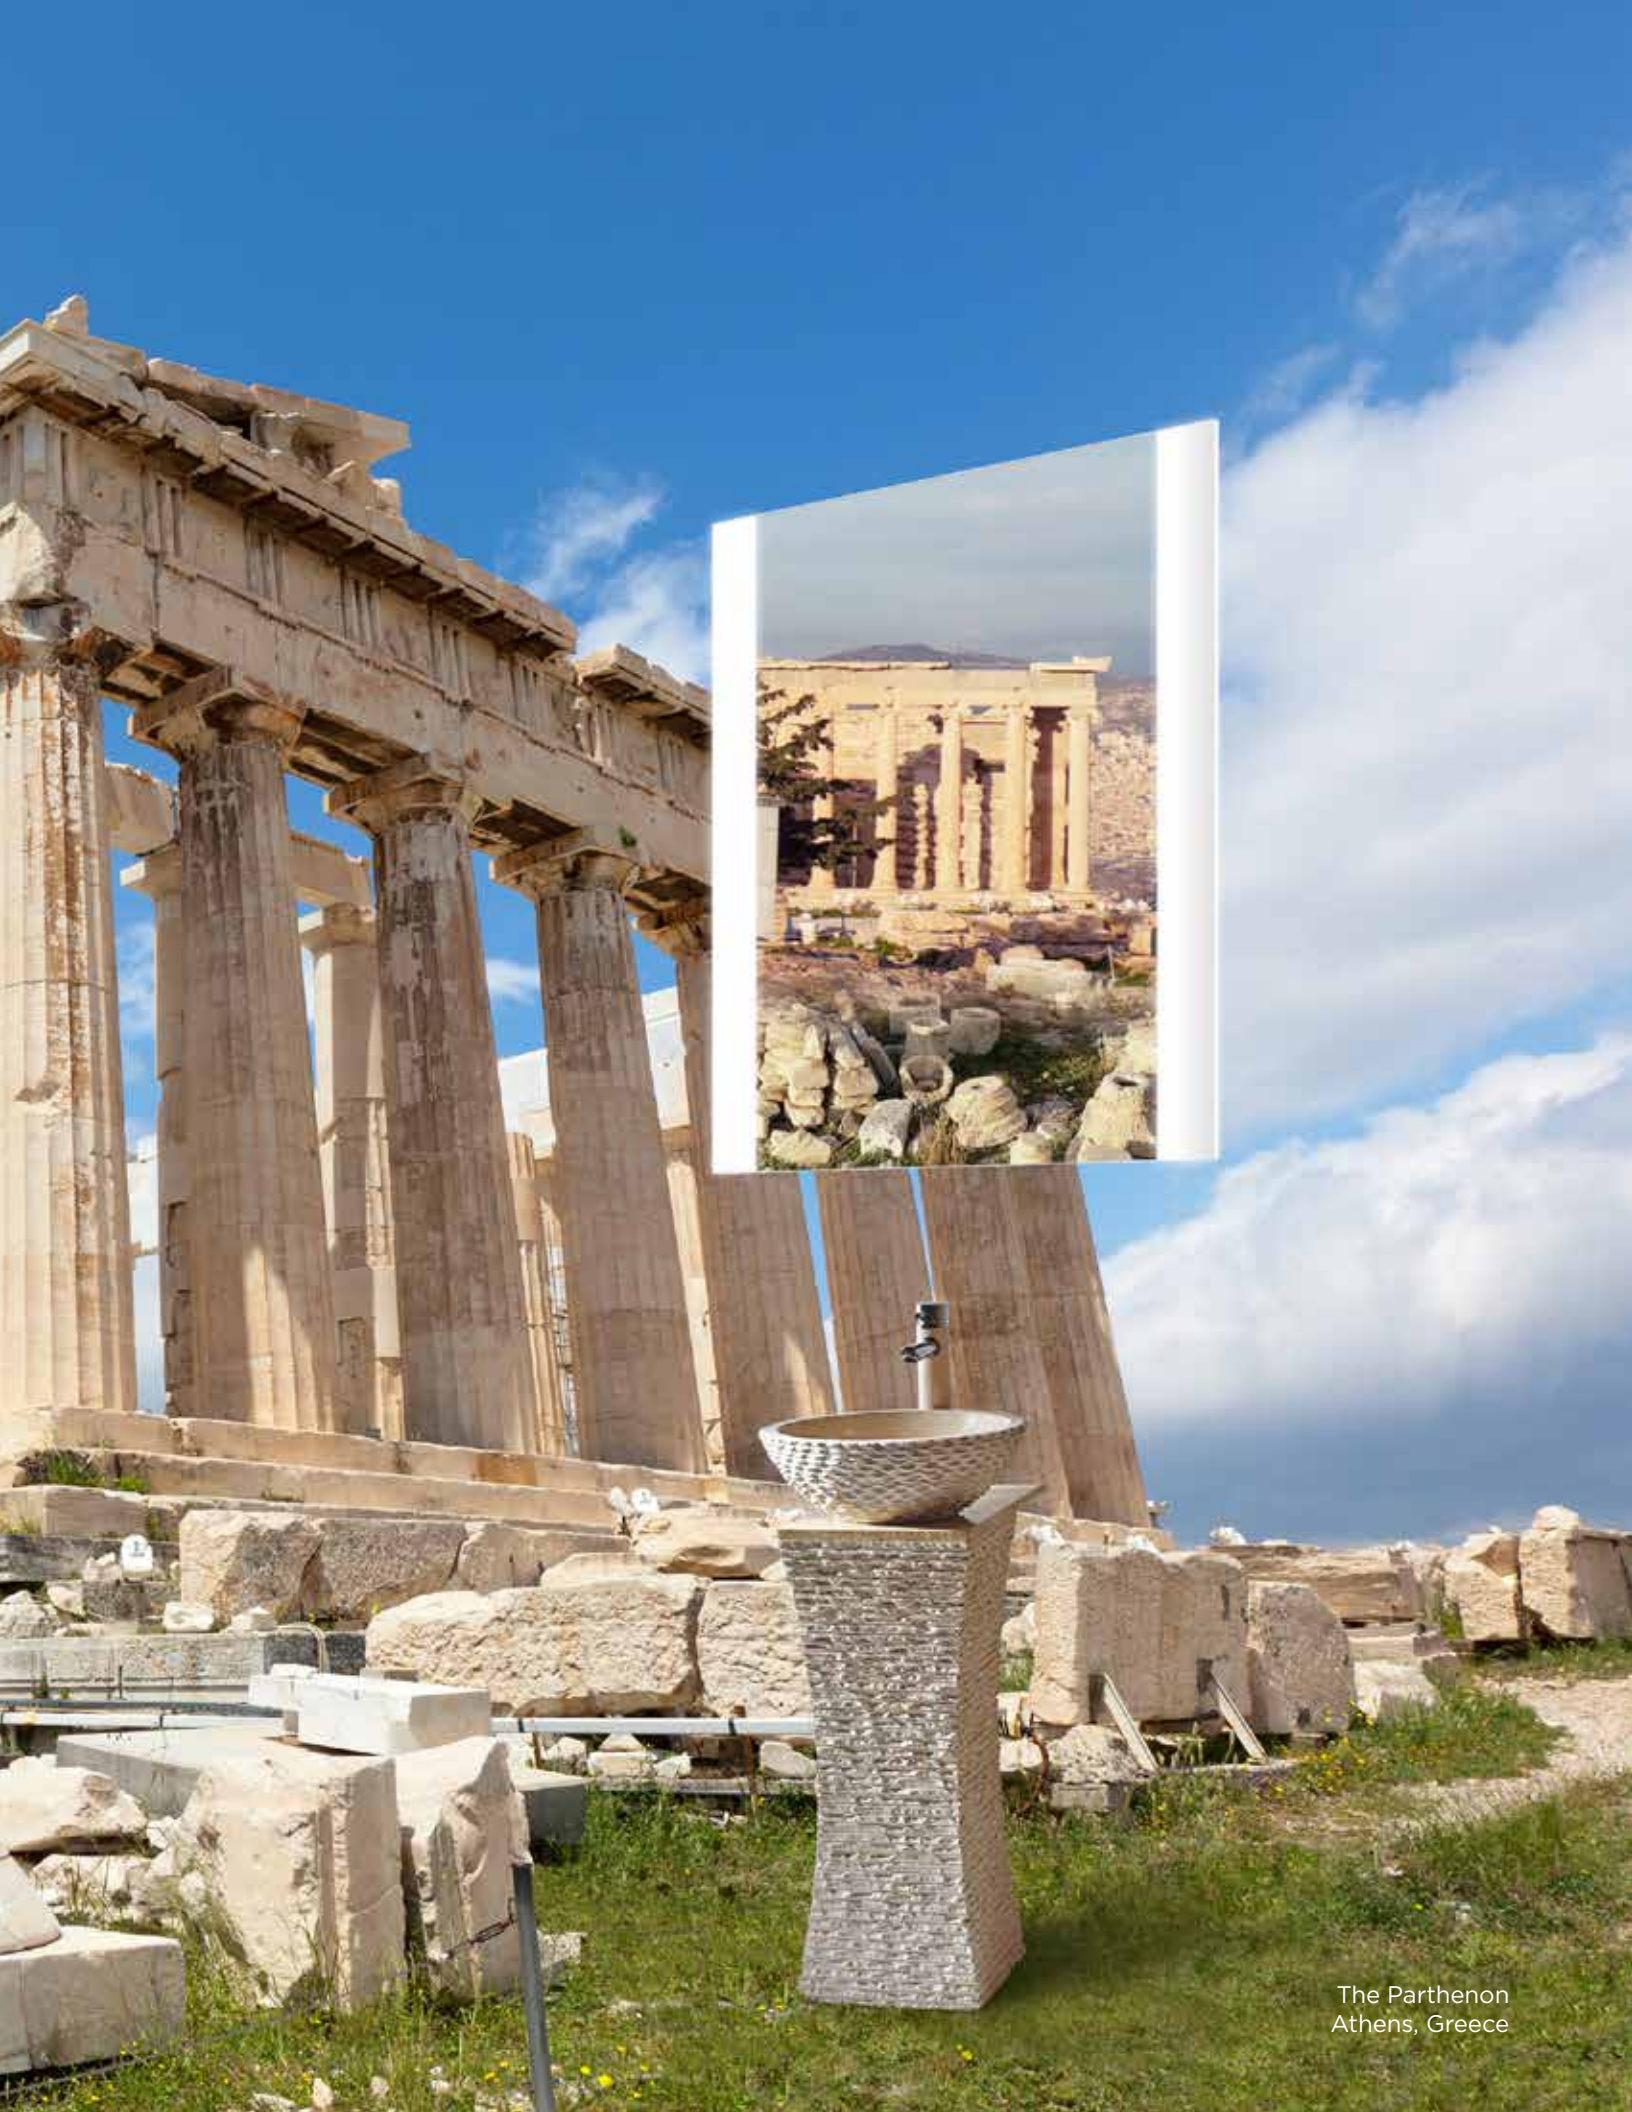

The Parthenon
Athens, Greece

Global Prestige

that affirms you're in good company.

Electric Mirror has been chosen for many of the world's most renowned and celebrated projects. From towering Middle East hotels and trendy 5th Avenue boutiques, to sleek Fortune 500 corporate offices and luxurious sporting arena owners' suites, our products are sought after by the world's leading brands.

Customization Expertise

Electric Mirror has the in-house capabilities, knowledge, and expertise to transform your brilliant ideas into brilliant products.

Custom Framed Fusion Lighted Mirror
Inn at the Mission, California
Kay Lang & Associates, Designer

A COMPREHENSIVE APPROACH

No matter how novel or unique your idea might be, Electric Mirror has everything necessary to take your concept from ideation through to production. We implement a multi-disciplinary process from start to finish, involving a significant number of our 200 team members to create and deliver a product that not only meets, but exceeds, your expectations.

CONCEPT DEVELOPMENT

We start by really listening, to ensure we understand your vision as well as you do. We evaluate the product requirements and key features you're looking for. Working with our in-house Research and Development team, we assess various approaches, ensuring each is feasible from both an engineering and manufacturing perspective. Then we propose a recommended solution for your consideration.

PRODUCT ENGINEERING

Once you've approved a design concept, we move forward with prototype engineering. We create electrical and mechanical engineering plans, ensuring the product will meet or exceed all code and certification requirements. We conduct an engineering assessment of key components, followed by a sourcing review to ensure all components are readily available. Then we create full documentation packets for building a prototype.

PROTOTYPE FABRICATION

With design and engineering complete, we move into prototype fabrication. Raw materials are gathered and assembled to produce the metal, electrical and mirror glass components of your product. Then, with Bill of Material (BOM) and Method of Manufacturing (MOM) documentation in hand, we create a First Article product.

QUALITY ASSURANCE

The First Article then goes through a rigorous inspection and review process with Engineering, Manufacturing, and Quality Assurance teams. Light testing is conducted, and a photometric assessment is completed. The prototype is reviewed to ensure it meets the original design, functionality, and usability requirements. If changes are required, they're documented, addressed, and a new prototype is produced for review.

MANUFACTURING PRODUCTION

With an approved prototype in hand, we move to the final stage—manufacturing production. We make any necessary updates to BOMs, MOMs and processes and their corresponding documentation to ensure consistency in manufacturing. We implement quality control and assurance processes specific to your product. And mindful still of your original vision, we bring your product to life.

Custom Concepts

If you can dream it, we can build it – from interesting shapes that captivate your attention to unique sizes that fit your space, no idea is beyond our capabilities.

Custom Integrity Lighted Mirror

EXPRESS YOUR STYLE

From strikingly simple, to sophisticatedly sleek, to interestingly intricate, Cameo Designs let you express your personal style and taste. Cameo turns your lighted mirror into an integral part of your décor, complementing and accentuating your overall design theme.

Custom Frost Pattern Lighted Mirror
Washington Plaza Hotel, Washington D.C.
Forrest Perkins, Designer

CREATE A CENTERPIECE

Our custom frost pattern mirrors are more than a functional lighting element—they're a spectacular focal point of artistic expression. With Cameo Designs, your lighted mirror becomes the center of attention, creating a memorable experience that's sure to be shared.

*Cameo Designs are available for large quantity orders.

Custom Frames

Add the distinctive panache of a beautiful and stylish frame to your mirror for a truly unique visual masterpiece without equal.

Custom Framed Eternity

THE BEST SELECTION

If you're looking for custom frames, no one offers more choices than Electric Mirror. Choose from metal, wood, polystyrene, and other options, in widths ranging from less than 1" to more than 5". Select from hundreds of profiles, colors, and finishes – or create your own. With virtually limitless options, we're certain we can create exactly what you're looking for*.

METAL FRAMES

The thin profile of metal frames provides a refined look and modern finish to our lighted mirrors, perfectly complementing your contemporary décor. Ideal for unique shapes – including radius corners, rounds and ovals – our metal frames are available in a vast array of finishes and colors. If clean lines and a sleek look are what you're after, metal frames are the way to go.

WOOD FRAMES

Nothing matches the luxury of classic wood frames for creating a warm and timeless look for your lighted mirrors. From standard substrates such as ash, oak, and pine, to exotic hardwoods like ayous, obeche and jelotung, wood frames give lighted mirrors a beautifully-handcrafted appearance. Wood frames are best suited for square and rectangular mirrors; and whether your style is basic or Bohemian, rustic, or regal, we can work with you to create the perfect frame for your next project.

POLYSTYRENE FRAMES

These frames are not only beautiful, they're beautifully made. The process starts by recycling polystyrene products and repurposing them into extruded moldings. The extrusions can then be finished in virtually any color, any finish, and any texture conceivable—currently 50,000 variations and counting. Polystyrene can also be used for ornate, custom molded frames with intricate designs. With this innovative and exclusive approach to framing, you're beautifying your project and your planet, all at once.

*Custom frames are available for large quantity orders.

OUR VALUE

Big Ben
London, England

Multi-Disciplinary Team Approach

When you choose Electric Mirror, you're getting the world's largest multi-disciplinary team of mirror-technology experts working on your behalf.

ACCOUNT MANAGEMENT

It starts with a global sales leadership team that brings extensive experience from multiple industry avenues, including interior design and hospitality management. It includes a robust group of sales representatives focused on knowing you, your market, and your projects. It continues with dedicated account managers that provide the product information you need. And it's supported with project coordinators who see your job through from start to finish, ensuring everything runs smoothly and according to plan.

RESEARCH AND DEVELOPMENT

Our R & D team members are masters of ingenuity. What new products do our customers need? What new technologies would provide value-added functionality? How can we improve the user experience? They set about to answer those questions, and along the way, develop groundbreaking new mirror technology products. To date, that spirit of invention has garnered over 20 industry awards, as well as over 60 design and utility patents.

ENGINEERING

We offer the largest engineering team in the industry, with over 20 design, electrical, mechanical and software engineers. Every day, they turn art into science and ideas into reality. Armed with extensive experience and the most sophisticated tools available, they translate product concepts into product blueprints, ready for manufacturing.

MANUFACTURING

It takes a lot of people to fill a 125,000 square foot manufacturing facility. And Electric Mirror's got them. Experts who cut, edge, bevel, laser and polish our mirrors. Machinists who punch, press, bend and weld our chassis. Technicians who measure, cut, and assemble our wire harnesses. Artisans who build our wood and metal frames by hand. And specialists who bring it all together by assembling our beautiful mirror technology products.

QUALITY ASSURANCE

Any idea is only as good as its execution, so we employ quality assurance experts, policies, and procedures every step of the way. Internationally-sourced components undergo vigorous qualification testing and ongoing monitoring. In-house, we establish stringent quality criteria and conduct ongoing review and testing of our products, ensuring they're perfect before they leave our plant.

LOGISTICS

Once they're ready to go, our logistics team gives every product the white-glove treatment. Packaging boxes are custom-designed for each unique product, and produced using computer-aided cutting and configuration equipment. Our in-house woodshop team builds custom crates for each job, sized to protect your precious cargo. And our shipping experts – with extensive global logistics experience – coordinate the details so your products arrive on time and in perfect condition.

CUSTOMER SERVICE

We do everything possible to ensure our company and our products provide an outstanding experience. So we have a team of experts on hand to address any questions or issues that may arise. Housed at our U.S. corporate headquarters, they have instant access to engineering, manufacturing and quality experts throughout our facility. And should you need on-site assistance, our anytime, anywhere field service team is only a phone call away.

Extensive Manufacturing Capabilities

Only Electric Mirror offers you the manufacturing capabilities that come from being the global leader in mirror technology products.

MULTIPLE MANUFACTURING FACILITIES

At times, different clients or projects may call for different manufacturing solutions. For some, complete customization capabilities are paramount, while for others, off-the-shelf products will suffice. Sometimes quick access to stock items and easy replacements are the driver, while other times it's cost that matters most. That's why we offer both a U.S.-based manufacturing plant at our global headquarters, as well as additional contract manufacturing in Asia. Having multiple options allows us to use the best solution for your product, timeline, and project location.

COMPLETE VERTICAL INTEGRATION

Because we have everything literally under one roof – engineering, electronics, sheet-metal production, mirror fabrication, wood crafting, mirror assembly, packaging, and shipping – we have complete manufacturing control over your products from start to finish. We ensure everything works together, and eliminate the challenge of dealing with multiple suppliers.

QUALITY ASSURANCE

To ensure our products exceed your expectations, we employ rigorous quality assurance measures at every stage. In our U.S. facility, a multidisciplinary Quality Team assesses critical quality checkpoints in engineering, model room orders, production runs, packaging and even shipping. At our international facilities, on-site quality engineers conduct ongoing facility qualifications and production evaluations.

STOCK AND STAT ITEMS

When time is tight, we've got you covered. Because most of our products are made in our vertically-integrated U.S. facility, there's no lengthy delay between vendors, resulting in lead times unmatched anywhere in the industry. Need it yesterday? We also offer many stock items ready for immediate shipping.

ADDITIONS AND REPLACEMENTS

Regardless of which facility produced your original products, if you need a few extras, or you need a quick replacement part, we can make it for you fast at our U.S. plant.
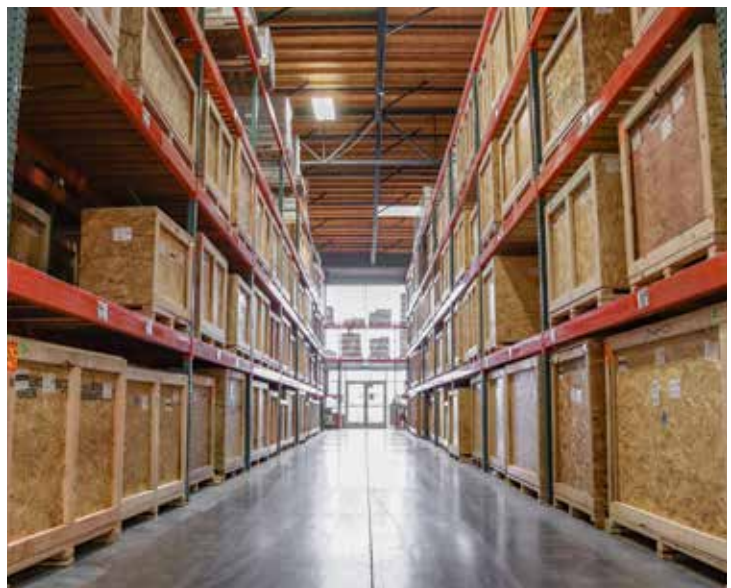

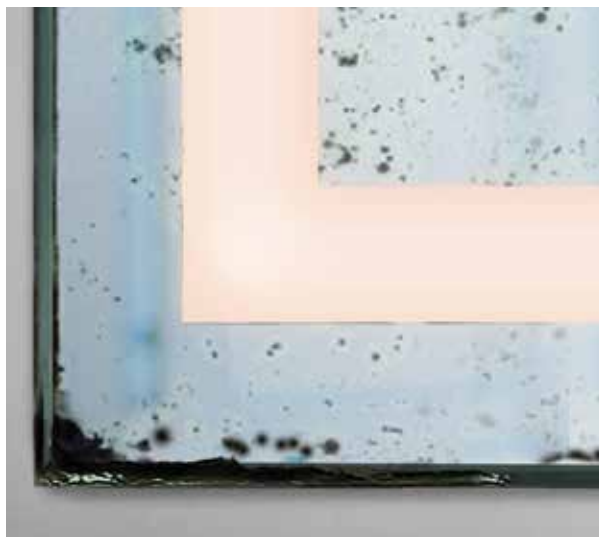

Superior Product Performance

Independent TUV testing proves OmegaMirror™ outlasts other mirrors at least 6 to 1.
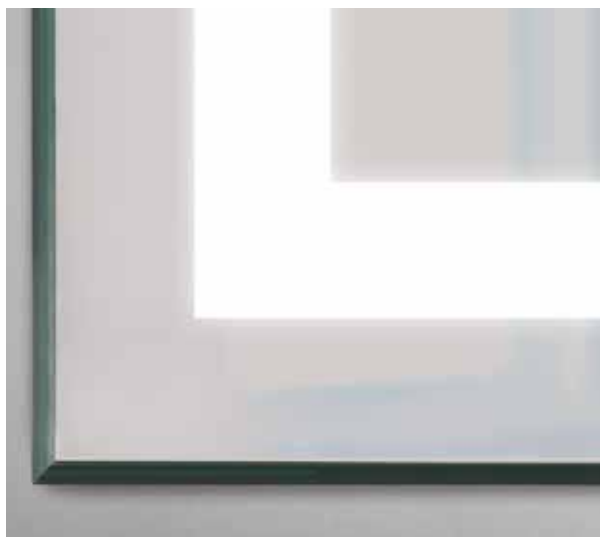

OmegaMirror

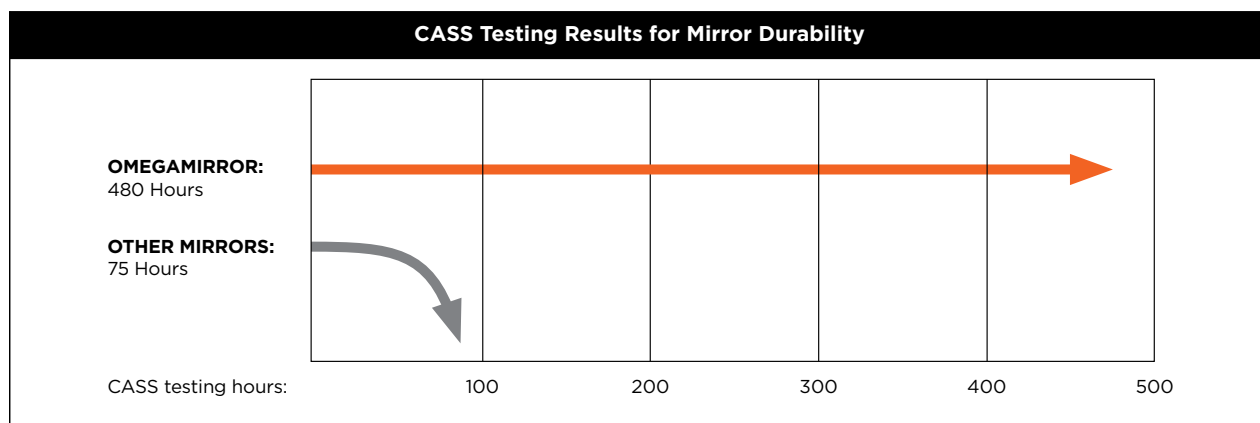

Other Mirrors

INSIST ON THE PROVEN, MOST DURABLE MIRROR FOR THE BATHROOM.

Mirrors subjected to a humid bathroom environment are prone to unsightly corrosion, so it's imperative any purchasing decision take into consideration the mirror's durability. The CASS[1] Testing Method, conducted by independent labs like UL and TUV, is the universally-preferred test for verifying the longevity of mirror products under harsh conditions.

With CASS Testing, most mirrors show signs of de-silvering, clouding and corrosion after only 75 hours. In comparison, OmegaMirror is rated "essentially faultless" after 480 hours of CASS testing, providing more than six times the corrosion-free durability and longevity of other mirrors.

The OmegaMirror Advantage

- Six times longer life
- Independently CASS tested
- 10-year warranty
- Lead and copper-free

CASS Testing Results for Mirror Durability

OMEGAMIRROR:
480 Hours

OTHER MIRRORS:
75 Hours

CASS testing hours: 100 200 300 400 500

INSIST ON THE MIRROR THAT SAFEGUARDS YOUR REPUTATION.

In environments like hotels, apartments, and hospitals, nothing creates a more important first – and lasting – impression than the bathroom mirror. If the mirror is spotless, so too must be the rest of the space. But if the mirror shows evidence of unsightly mold and blackspot corrosion, who knows what's lurking elsewhere in the room? Only OmegaMirror delivers years of outstanding performance that protects your property's reputation.

INSIST ON THE MIRROR THAT PROTECTS YOUR CUSTOMERS AND THE ENVIRONMENT.

Use of lead-free, copper-free OmegaMirror reduces your ecological footprint and protects indoor air quality by emitting virtually no volatile organic compounds.

Electric Mirror invested in its own CASS Chamber for testing[1]

INSIST ON THE MIRROR THAT PASSES THE INDUSTRY'S MOST THOROUGH TESTING.

OmegaMirror undergoes the industry's most rigorous, ongoing testing to ensure it meets the standard for superior performance. How do other mirrors measure up?

Test	OmegaMirror	Other Mirrors
Independent TUV CASS Test: Four complete testing cycles totaling 480 hours	✓	No
Internal CASS Test: Supplemental using Electric Mirror's own CASS Chamber	✓	No
Acid Resistance Test: Soaked in strong acid solution for 20 hours	✓	?
Alkaline Resistance Test: Submerged in strong alkaline solution for 20 hours	✓	?
Independent UL Adhesives Test: Production adhesives applied to ensure compatibility	✓	?
Mechanical Shear Test: Mirror hanger subjected to 500 lb./square inch test to ensure backing doesn't separate	✓	?

INSIST ON THE MIRROR THAT OFFERS THE LOWEST TOTAL COST OF OWNERSHIP.

Standard maintenance practices may necessitate replacement of bathroom mirrors every three years due to unsightly mold, black-edge, and corrosion. OmegaMirror last six times longer than standard mirror[2], eliminating the replacement cost in a typical renovation cycle. For a 200-room hotel, this could save $135,000 over 10 years[3]. OmegaMirror not only delivers the best quality, it delivers the best value.

Replacement Cost Comparison Between OmegaMirror and Other Mirrors[2]

OmegaMirror:	Initial Purchase				**OmegaMirror: $0**
Other Mirrors:	Initial Purchase	Mirror Replacement: $45,000	Mirror Replacement: $45,000	Mirror Replacement: $45,000	**Other Mirrors: $135,000**
	Initial Installation	**At 3 Years**	**At 6 Years**	**At 9 Years**	
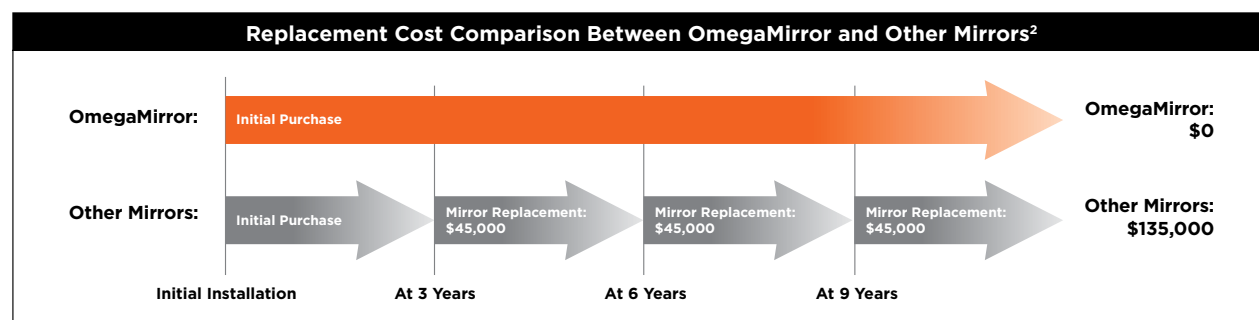

[1] The Copper Accelerated Acetic Acid Salt Spray (CASS) test is a standardized method used around the world to determine corrosion resistance of materials and coatings. CASS testing for mirrors involves placing mirror samples in a special CASS Chamber and subjecting them to a continual attack of corrosive agents that mimic a bathroom environment. The longer the samples remain corrosion free, the longer they will perform in an actual bathroom.

[2] Use of some glass cleaners may affect longevity. See warranty for details.

[3] Mirror longevity assumes one shower per day; average U.S. shower duration is 8.2 minutes according to Alliance for Water Efficiency, 2019.

Specialized Mirror Solutions

We approach glass and mirror with the final products in mind, scientifically engineering unique solutions for optimal product performance.

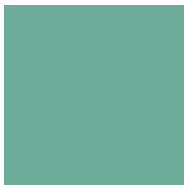

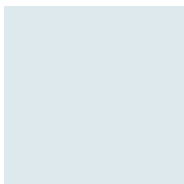

Industry Standard

Diamond Clear

GLASS TECHNOLOGY

Virtually all mirror glass has a degree of subtle intrinsic color, from a pronounced green tint to nearly clear. Understanding the difference helps you select the best product for your project.

INDUSTRY STANDARD

Typical industry-standard mirrors have a slight green tint, especially noticeable around the mirror edges. The green color is caused by iron, an element necessary for the production of mirror glass. The higher the iron content, the more noticeable the green tint. This type of mirror is suitable for many applications, including recessed or framed mirrors.

DIAMOND CLEAR

While we offer industry-standard mirror glass, some products are better suited to our Diamond Clear™ mirror. Diamond Clear has a lower iron content, which provides a whiter edge, a more natural reflection, and an ideal light color.

MIRROR TECHNOLOGY

Mirror glass used for mirror TVs has three important components to consider: mirror reflectivity, TV transmission, and TV screen area reflectivity. The environment in which the mirror TV will be used can help determine the best mirror glass option.

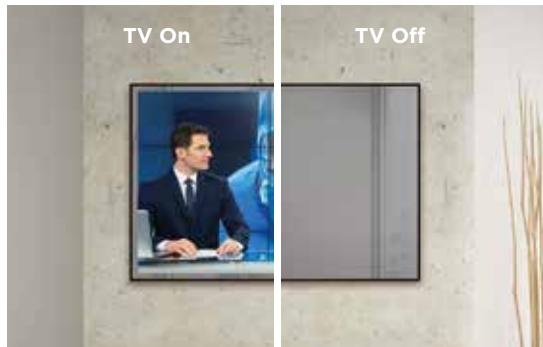

IRIS

Iris® mirror, used on our Entertainment Mirror TVs and Eclipse™ TV Covers, offers stunning quality, reduced glare, and a viewing experience close to that of a standard monitor or HDTV. The display virtually vanishes when off, leaving only a subtle, faint outline of the display perimeter that may be noticeable up close. Iris mirror is slightly darker than a typical mirror, making it ideal for guest rooms, bedrooms and living areas.
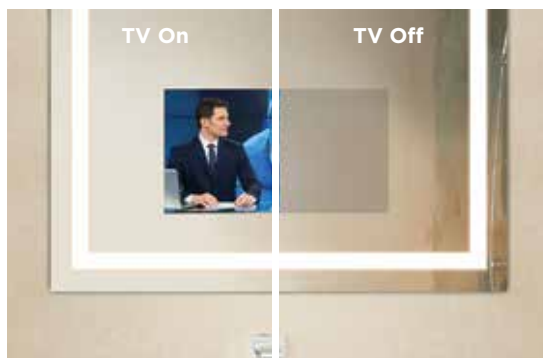

SPECTRUM

Best suited for bathrooms that are not all white or overly bright, Spectrum™ mirrors have a highly reflective mirror surface and provide a good TV image when turned on. When the TV is off, the screen area is camouflaged, leaving only a light gray image where the TV is located.
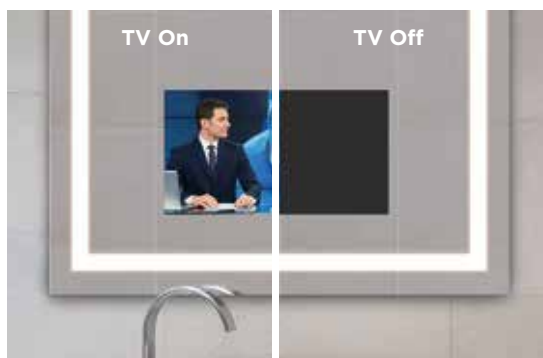

B-SERIES

Ideal for all-white or brightly colored bathrooms, B-Series™ provides a crisp, clear viewing experience with reduced glare. B-Series mirrors have a highly reflective mirror surface and an impressively bright TV image when turned on. When the TV is off, the TV screen area is black.

Exceptional LED Lighting

Understanding some of the finer points of LED lighting will help you recognize why our LEDs lead the industry.

THE HIGHEST LED STANDARD

Our dimmable, replaceable, energy-saving LEDs raise the bar on quality, color, and brightness. In fact, not only do our LEDs have the best performance, they come standard in all of our lighted mirrors, polycarbonate mirrors, lighted mirror TVs, lighted mirrored cabinets, lighted wardrobe mirrors, lighted corridor sconces, and lighted fog-free mirrors.

THE BEST COLOR TEMPERATURE

Color temperature, measured on a Kelvin (K) scale, is often an aesthetic choice. Since we know a bright, warm color is generally most flattering, we designed our mirrors with the standard light temperature of 3,000K. If you want the ability to alternate between a range of LED colors, we offer our exclusive Ava™ technology, available in many of our lighted mirror products.

**7000K**

3000K

1500K
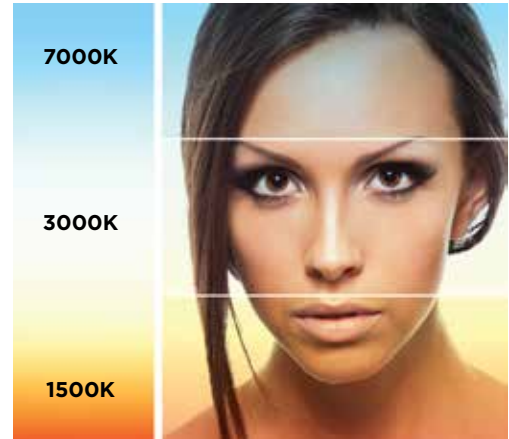

THE MOST ACCURATE LIGHT

The Color Rendering Index (CRI) is a measurement scale of how accurately a light source reflects true colors, and is expressed in a range from 0 to 100. A higher CRI indicates a more accurate color reflection. While most LED-lighted mirrors have CRIs of 80 or lower, ours boast CRIs of 90+, creating the most natural-looking color available.

CRI 60
Unnatural Color

CRI 90
Natural Color

THE GREATEST EFFECTIVE ILLUMINATION

Since lumen output diminishes over time, and anything less than 70% is considered insufficient, it's important to choose lighted mirrors with dependable, long-lasting LEDs. We select LEDs with a calculated L_{70} lifespan of 52,000 to 140,000 hours, easily providing many years of the best light without compromise.

WE PUT SAFETY FIRST

As important as mirror aesthetics and performance are, mirror safety is even more essential. Mirror technology products must be electrically safe to withstand high voltage spikes or stray current. Mechanically safe to ensure no one is injured installing or using the product. And environmentally safe to ensure safe operating temperatures. Independent product certifications ensure our products meet these safety requirements.

WE DESIGN FOR SAFETY

Our engineers are well versed in product safety requirements, and design all of our products with electrical, mechanical, and environmental safety in mind. We work with independent experts to conduct onsite safety training presentations and demonstrations. And because we have collaborative relationships with the regulatory agencies, we're able to speak with their engineers frequently during our product design process to ensure our products are compliant.

WE MEET SAFETY STANDARDS

Every Electric Mirror product has been thoroughly evaluated by nationally-recognized testing laboratories such as UL, ULc, CE, FCC, CB Scheme, Intertek, and TUV. Our products are listed in the countries in which they're sold, meaning they're certified to the appropriate standards as required by each country's governing electrical code. In addition, our manufacturing facilities undergo unannounced quarterly follow-up inspections to verify we continue to meet or exceed all requirements.

Certifications 101

Why is testing to standards important?

Nationally Recognized Testing Laboratories (NRTL) use standardized testing to investigate materials, components, products, and systems. Having uniform standards accomplish two main objectives. First, by submitting products through a rigorous testing procedure, the standards help ensure a particular product is safe for its intended use. Second, through ongoing factory inspections, the standards ensure manufacturers continue to produce products to the appropriate safety standards.

If a manufacturer uses approved components, does that mean the overall product is approved?

Some manufacturers claim that if their product uses approved components, then the product itself is approved. This is simply not the case. Individually recognized components are tested to completely different standards than are fully manufactured products. For example, a lighted mirror may use an approved power supply, but may not have been tested as a complete assembly.

What's the risk of using products that aren't tested or approved?

Products that are not tested and certified to all of the appropriate standards may not be safe to operate. Furthermore, they are not approved for installation, risk being removed by electrical inspectors, and create exposure for possible future legal liability.
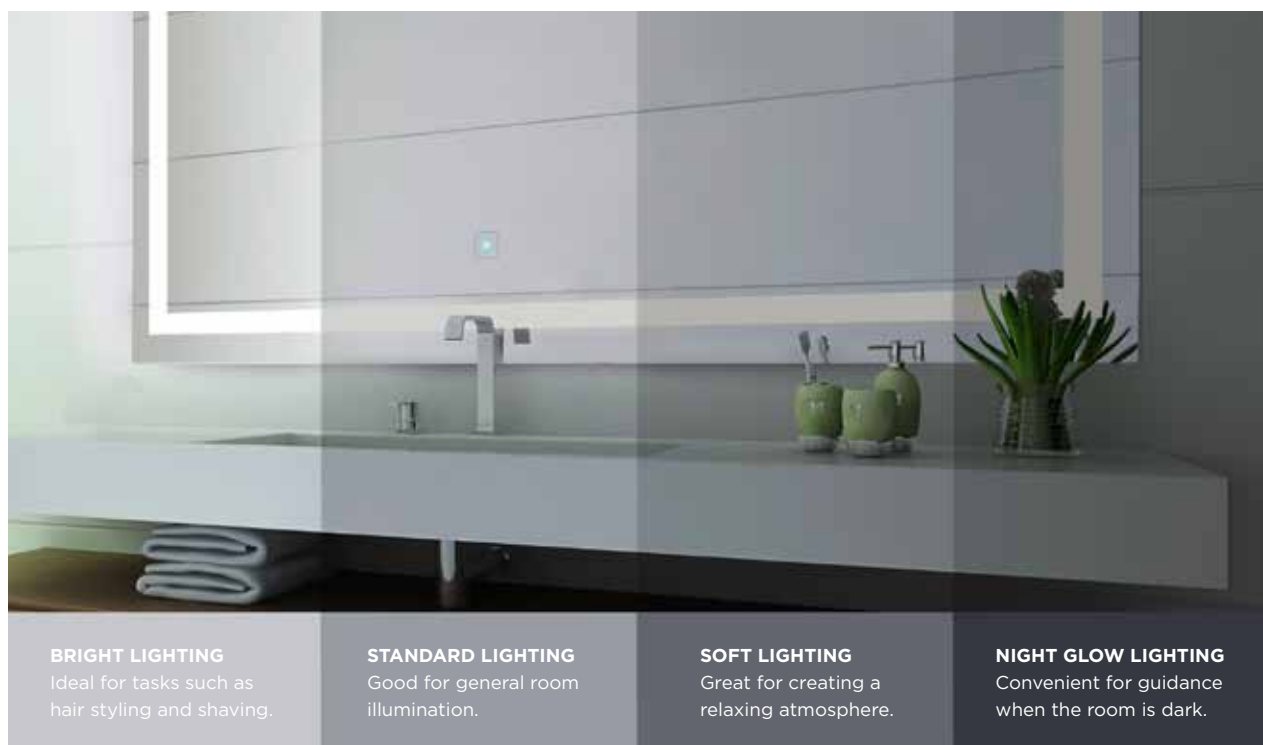

Technology

CONTENTS

Keen™

Bring your lighted mirrors to life with the beauty and functionality of Keen™ Technology, which offers dimming, eco-friendly technology, and Night Glow with a touch.

BRIGHT LIGHTING
Ideal for tasks such as hair styling and shaving.

STANDARD LIGHTING
Good for general room illumination.

SOFT LIGHTING
Great for creating a relaxing atmosphere.

NIGHT GLOW LIGHTING
Convenient for guidance when the room is dark.

THE RICHEST DIMMING EXPERIENCE

Keen's thoughtful design provides a range of light levels to satisfy every lighting need. Plus, the innovative engineering makes interacting with Keen a luxurious experience:

• The intuitive interface is seamlessly integrated into the mirror, offering a sleek and beautiful design.

• Lighting initiates at 66 percent, then brightens or dims by tapping the Keen icon.

• Night Glow mode provides just enough lighting to ensure safety when the room is dark, and the Eye-Sensitivity Adjustment technology automatically reduces the light level as eyes adjust to low light.

THE SMARTEST ECO-FRIENDLY TECHNOLOGY

The intelligent sensor in Keen supports your commitment to the environment:

• It automatically dims the lighted mirror to 10% after an hour of non-use.

• It helps you help the environment even if the lights are inadvertently left on.

THE EASIEST OPERATION

| On (66%) | 100% | Night Glow | 25% | 66% |

Tap to cycle through On at 66%, 100%, Night Glow, 25% and back to 66%.

| 100% | 25% |
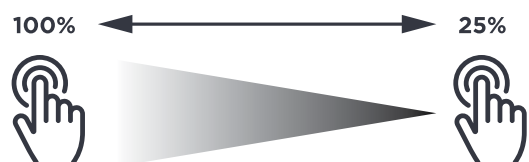

Touch and hold to gradually change light
between 100% and 25% brightness.

1h

After one hour of non-use, Keen's
Energy Save Mode automatically
dims the lights to 10% brightness.

This product is protected by one or more patents.

Ava™

Ava™ Technology takes task lighting to a beautiful new level, allowing you to easily change the LED light color to suit your needs.

2,700K
Perfect for an early morning hike, an intimate evening dinner, or a night at the theater.

4,600K
Excellent for that important meeting in the boardroom, a busy day on campus, or a quick get-together with friends for lunch.

6,500K
Ideal for a leisurely day at the pool, 18 holes at the local country club, or a relaxing cruise.

THE IDEAL SETTINGS FOR ANY SETTING

Ava gives you the confidence to look your best in any environment. The tunable LED lights let you select the color that best matches the environment you're preparing for — outdoors, indoors, or evening, or anything in between.

THE BEAUTY OF SIMPLE INTERACTION

2,700K   6,500K
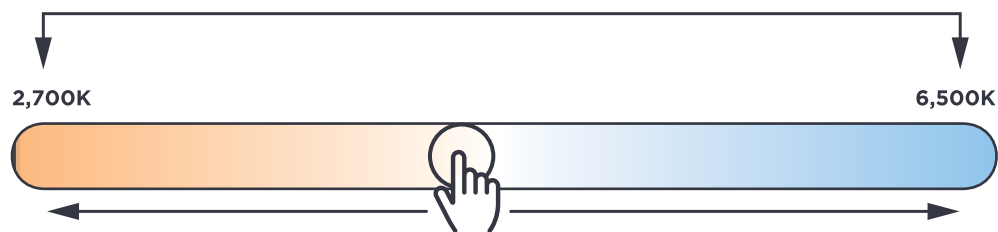

Mirror first turns on at 2,700K at full brightness. Touch and hold the Ava button to change the light color from 2,700 to 6,500K.

After one hour of non-use, Ava's Energy Save Mode automatically dims the lights to 10% brightness. Tapping the button in this state returns it to 100% brightness.

Vive ®

Vive allows you to pair a streaming audio enabled smart phone or tablet to the mirror, instantly transforming it into a wireless stereo system.

VIVE IS MUSIC TO THE EYES

Fine tune lighted mirrors and wardrobe mirrors with Vive and turn any room into a virtual amphitheater. Vive pairs your smart phone or tablet to the mirror, instantly transforming it into a wireless stereo system. Simple and easy to use, Vive can create a symphonic streaming audio experience in any space with just a touch.

VIVE MAKES IT EASY TO FACE THE MUSIC

1. Simply touch the power button on the mirror.

2. On your streaming audio enabled device, select "Electric Mirror" in your streaming audio settings. Your device will be paired to the mirror when the blinking white sync light turns solid white.

3. Once paired, start your music via your device. Control the volume directly from your device.

BREAK THE SOUND BARRIER WITH VIVE

• Premium sound through the mirror's integrated speakers.

• No docking station needed — save valuable countertop space.

• Full function of a streaming audio enabled phone or tablet when paired.

• An impressive 100-foot range for the streaming audio signal.

• Compatible with any Electric Mirror framed or lighted mirror products.

This product is protected by one or more patents.

Poet™

Use Poet™ Technology for a unique way to connect with people that will leave them feeling pleasantly surprised and thoroughly delighted.

COMMUNICATE IN AN ENTIRELY NEW WAY

Poet lets you inspire people with messages that unexpectedly appear, then vanish, in the their mirrors. Using Poet, you can capture peoples' attention with poetic words, thought-provoking phrases or inspirational quotes[1].

CUSTOMIZE THE MESSAGE TO REFLECT YOUR BRAND

The Poet lets you create one, two, or even three-part messages that illuminate long enough to be read, and then vanish, returning the mirror to its original reflective state. Whatever your message, Poet brings it to life in a way that creates an indelible impression with everyone who sees it[1].

MAKE A BEAUTIFUL STATEMENT

The artistically-designed Poet message is laser etched into the back of the mirror. When the mirror is turned on, at first only the mirror lights illuminate. Then, within seconds, the messages begin to appear, each part illuminating and then vanishing in succession independent from the others. When the message sequence is complete, the mirror reverts to a traditional lighted mirror.

[1] Poet model room orders require $5K and 5 month lead time for Poet mirror. Poet production orders require $150K in Poet mirrors and 6 month lead time.

This product is patent pending.

Seamless™

Time is on your side when you use Seamless™ Technology to embed a stunning LED clock into your lighted mirrors.

EXPERIENCE FLAWLESS TIME WITHOUT EQUAL

Innovative and convenient, the Seamless LED Clock is a must-have addition for lighted mirrors, lighted mirror TVs, and wardrobe mirrors. Featuring illuminated digits that shine through the mirror without the distraction of a clock display window, Seamless creates an image of time that flawlessly blends in with the mirror's surface.

Seamless

Other clocks

ENJOY THE BEST OF BOTH FORM AND FUNCTION

The included remote control lets the end-user easily adjust the LED brightness and alternate between 12-hour and 24-hour options.

TAKE ADVANTAGE OF SYNCHRONIZED SIMPLICITY

Seamless also offers a synchronized clock programming system, allowing you to clone settings for every mirror on the property with one adjustment.

Using the Automatic Clock Programmer handheld remote (sold separately), you can easily synchronize the clock settings with one touch of a button — ideal for time changes and new installations.

SEAMLESS™ LED CLOCK

ELECTRIC MIRROR®

HOUR   MIN   DIM   FN

12/24 —— FLIP —— RESET
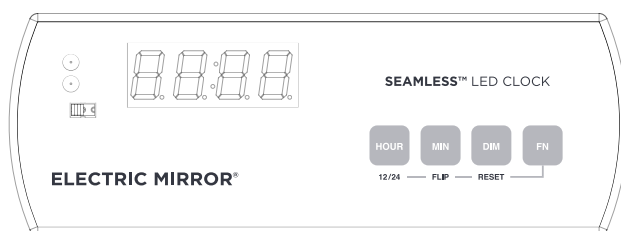

Polaris™

Like the Northern Star, our Polaris™ Technology nightlight collection offers innovative solutions to light the way.

Polaris Motion Sensor Nightlight

Polaris Wall Switch Nightlight

CONVENIENT, AFFORDABLE SOLUTIONS

The Polaris nightlight collection features energy-efficient LED nightlights that emit soft 2,200K amber-colored light. The amber color has been proven to support peaceful, uninterrupted sleep, maintaining the body's natural circadian rhythm sleep-wake cycle. However, when the need arises, the nightlights illuminate the surrounding area, supporting safer navigate around the room.

TWO WAYS TO SEE THE LIGHT

1. **Polaris Motion Sensor Nightlight:**

   Centered along the lower edge of the mirror, this nightlight is activated by a motion detector that extends from the bottom.

   • It automatically turns on when the room is mostly dark and motion is detected. The light turns off three minutes after motion is no longer detected.

   • The nightlight is battery operated, and requires no additional wiring.

   • The batteries recharge from the electricity that powers the lights in the mirror when the lights are turned on.

2. **Polaris Wall Switch Nightlight:**

   Centered at the bottom of the mirror and hidden from view behind the mirror surface, the nightlight is activated by a three-way wall switch that controls the mirror lights and the nightlight.

   • You have complete control over when the night light is on or off.

   • This nightlight is hardwired.

Polaris Wall Switch Nightlight

Televisions

No matter what room you're focusing on — from bathrooms to living areas to public spaces — we offer TV technology to enhance the ambiance of the environment.

ENTERTAINMENT MIRROR TVS MAKE ANY LIVING SPACE MORE LUXURIENT

Any project is better when it includes the style and versatility of an entertainment mirror TV. Our design integrates a high definition LED smart TV into a superior quality wall mirror, with patented technology that allows the vibrant TV to display when on, then disappear when off.

MIRROR TVS ADD CONVENIENT FUNCTIONALITY TO THE BATHROOM

Few features add more exquisite convenience to a vanity mirror than a TV. When connected to local cable provider or favorite device such as Roku, Apple TV, Fire Box, etc., our bathroom-mirror TVs will help users better prepare for the day with timely morning weather and traffic reports, or get ready to retire for the evening while catching up on the day's headlines.

TV COVERS PUT THE FOCUS ON THE ROOM'S STYLISH DÉCOR, NOT THE TV

Our ingenious Eclipse™ TV Cover instantly transforms an existing flat-screen TV into a beautiful mirror, making the room feel larger and more sumptuous. When the TV is on, the Iris® mirror glass ensures a premium viewing experience with a bright image and reduced glare. When the TV is off, Eclipse becomes a sleek and modern mirror that magnifies and reflects the luxury of the surrounding space. Eclipse is easy and quick to install, and the universal design accommodates virtually all standard flat-screen TVs. Eclipse offers a fast, affordable and elegant way to create a more refined room.

Hospitality TV

Guests love our bathroom hospitality mirror TVs, and you'll love our Genesis II™ Technology that makes it simple to provide them with an outstanding hospitality TV experience.

THE BEST OF BOTH WORLDS

Our Hospitality TV solution provides the perfect combination of ease of use for hotel guests and ease of programming for hotel staff. When it comes to hospitality TV, only Electric Mirror can provide the features you need, the simplicity you want, and the quality you expect.

A BETTER TV VIEWING EXPERIENCE FOR YOUR GUESTS

A bathroom mirror TV offers hotel guests the ultimate luxury: access to their favorite content in the privacy of their bathroom. Offering a memorable guest experience, it creates a positive and long-lasting impression of the hotel they're sure to tell others about.

A BETTER HOSPITALITY TV SOLUTION FOR YOU

Genesis II is an innovative solution that integrates with your hospitality media management systems. Our Hospitality TV is designed to work with your IPTV set-top-box (STB) providing your guests with premium in-room entertainment and a great hospitality experience.[1]

HOSPITALITY FEATURES YOU CAN OFFER YOUR GUESTS WITH IPTV SOLUTIONS[1]

In-Room Entertainment
Provide guests with their favorite movies, streaming content, music and free-to-guest programming.

Hotel Marketing
Display your hotel logo, on-screen directory or in-house ads to provide your guests with reminders of everything your property has to offer.

Guest Info
Provide flight data, local weather, in-room dining and other guest-requested items such as extra pillows.

Channel Mapping
Eliminate confusion and give your guests the same channel line-up in the bathroom as in the guestroom, including channel skipping and blocking.

Volume Control
Set your preferred minimum and maximum volume levels to help minimize disturbance to other hotel guests.

Waterproof Remote
Make TV control simple for guests with our buoyant waterproof guest remote.

PRODUCT FEATURES WE CAN OFFER YOU

Superior Mirror TV
Our Mirror TVs feature OmegaMirror™ anti-corrosion mirror, state-of-the-art integrated speakers, HDMI, HDMI (CEC), USB, RS232, and IR pass-through controls, and comprehensive safety standards compliance.

Exceptional TV Display
Enjoy your choice of a 15.6" or 21.5" ultra-slim 1" TV featuring an LED HDTV high-bright panel, 1920 x 1080 resolution, a 16:9 true wide screen ratio, and a 50,000 hour product life.

[1] Requires Set Top Box, neither included nor programmed by Electric Mirror.

LIGHTED MIRRORS

Roman Colosseum
Rome, Italy

Aria™ Lighted Mirror

The Aria™ offers a delicate dichotomy of design for any project requiring a unique new look: the romantic curves of rounded corners combined with the exacting look of a symmetrical inset border of light.

DIMENSIONS

- 24″W x 36″H (610mm x 914mm)
- 36″W x 36″H (914mm x 914mm)
- 48″W x 36″H (1219mm x 914mm)
- 60″W x 36″H (1524mm x 914mm)

Width (W)

Depth (D)

Height (H)

Frost Width
1.25 in., 32 mm

Border Width
(all sides)
1.75 in., 44 mm

FEATURES AND BENEFITS

- Lead-free, copper-free, corrosion-resistant OmegaMirror™ glass
- Forward-facing task lighting
- Suitable for damp bathroom environments
- Environmentally sustainable
- Energy efficient
- Fast lead times
- Easy installation
- Title 24 compliance available
- 10-year limited warranty
- Covered by one or more patents
- Made in America with U.S. and global components

AVAILABLE OPTIONS

- Ava™ Technology [1, 2]
- Keen™ Technology [2]
- Polaris™ Technology [1, 2]
- Seamless™ Technology [1, 2]
- Vive™ Technology [1, 2]
- Defogger
- CCT: 2,700K
- 0-10V dimming
- Forward-phase dimming
- 277V available [3]
- Custom sizes

LIGHTING SPECIFICATIONS

- Natural-looking LED light color
- CRI: 90+
- CCT: 3,000 Kelvin
- Replaceable LEDs
- 604 lumens per foot
- Maximum 100 lumens per watt efficacy
- Calculated L_{70} 124,000-hour LED lifespan

SAFETY SPECIFICATIONS

- Entire assembly meets UL/cUL standards
- International certifications
- Safety-backed mirror

INSTALLATION SPECIFICATIONS

- 120V-240V hardwire electrical connection; provide 36″ whip; junction box not required
- Chassis should be mounted to wall studs; mounting holes are provided
- Controlled by non-dimming on/off wall switch
- Installation wiring may be different on mirrors equipped with additional options
- Fixture can only be hung in the WxH orientation as shown; fixture is not field-interchangeable

[1] Minimum order quantity required.

Novo™ with Wall Glow Lighted Mirror

A favorite among designers, architects and users, this Novo™ features forward-facing task lighting combined with a halo of soft, ambient light on all four sides, eliminating the need for additional vanity lighting.

DIMENSIONS

- 30"W x 42"H (762mm x 1067mm)
- 36"W x 42"H (914mm x 1067mm)
- 48"W x 42"H (1219mm x 1067mm)
- 60"W x 42"H (1524mm x 1067mm)

Width (W)

Height (H)

Depth (D)

Frost Width
3 in., 76 mm

FEATURES AND BENEFITS

- Lead-free, copper-free, corrosion-resistant OmegaMirror™ glass
- Forward-facing task lighting
- Wall-glow ambient lighting on all four sides with diffuser for a finished side view
- Suitable for damp bathroom environments
- Environmentally sustainable
- Energy efficient
- Fast lead times
- Easy installation
- ADA compliant
- Title 24 compliance available
- 10-year limited warranty
- Covered by one or more patents
- Made in America with U.S. and global components

AVAILABLE OPTIONS

- Ava™ Technology [1, 2]
- Keen™ Technology [2]
- Polaris™ Technology [1, 2]
- Seamless™ Technology [1, 2]
- Vive™ Technology [1, 2]
- Defogger
- CCT: 2,700K
- 0-10V dimming
- Forward-phase dimming
- 277V available [3]
- Custom sizes

LIGHTING SPECIFICATIONS

- Natural-looking LED light color
- CRI: 90+
- CCT: 3,000 Kelvin
- Replaceable LEDs
- 720 lumens per foot
- Maximum 100 lumens per watt efficacy
- Calculated L_{70} 52,000-hour LED lifespan

SAFETY SPECIFICATIONS

- Entire assembly meets UL/cUL standards
- International certifications
- Safety-backed mirror

INSTALLATION SPECIFICATIONS

- 120V-240V hardwire electrical connection; provide 36" whip; junction box not required
- Chassis should be mounted to wall studs; mounting holes are provided
- Controlled by non-dimming on/off wall switch
- Installation wiring may be different on mirrors equipped with additional options
- Fixture can only be hung in the WxH orientation as shown; fixture is not field-interchangeable

Fusion™ Wardrobe Mirror

The ideal Fusion™ comes from a combination of clean, strong lines and efficient, natural-looking LED lighting — adding a modern statement of prestige while acting as a prominent focal piece for bedrooms, bathrooms, and walk-in closets.

DIMENSIONS

- 26″W x 60″H (660mm x 1524mm)

Width (W)

Depth (D)

Border Width (top/bottom)
2 in., 51 mm

Height (H)

Frost Width
2 in., 51 mm

Border Width (sides)
2 in., 51 mm

FEATURES AND BENEFITS

- Lead-free, copper-free, corrosion-resistant OmegaMirror™ glass
- Forward-facing task lighting
- Suitable for damp bathroom environments
- Environmentally sustainable
- Energy efficient
- Fast lead times
- Easy installation
- ADA compliant
- Title 24 compliance available
- 10-year limited warranty
- Covered by one or more patents
- Made in America with U.S. and global components

AVAILABLE OPTIONS

- Ava™ Technology [1, 2]
- Keen™ Technology [2]
- Polaris™ Technology [1, 2]
- Seamless™ Technology [1, 2]
- Vive™ Technology [1, 2]
- Defogger
- CCT: 2,700K
- 0-10V dimming
- Forward-phase dimming
- 277V available [3]
- Custom sizes

LIGHTING SPECIFICATIONS

- Natural-looking LED light color
- CRI: 90+
- CCT: 3,000 Kelvin
- Replaceable LEDs
- 604 lumens per foot
- Maximum 100 lumens per watt efficacy
- Calculated L_{70} 52,000-hour LED lifespan

SAFETY SPECIFICATIONS

- Entire assembly meets UL/cUL standards
- International certifications
- Safety-backed mirror

INSTALLATION SPECIFICATIONS

- 120V-240V hardwire electrical connection; provide 36″ whip; junction box not required
- Chassis should be mounted to wall studs; mounting holes are provided
- Controlled by non-dimming on/off wall switch
- Installation wiring may be different on mirrors equipped with additional options
- Fixture can only be hung in the WxH orientation as shown; fixture is not field-interchangeable

[1] Minimum order quantity required.
[2] See technology specification sheets for more details.
[3] May not be compatible with all upgrades and options.

Integrity™ Wardrobe Mirror

Add glimmering light and tasteful grace to any space with a powerful impression of Integrity™. Featuring a smooth polished edge and brilliant inner frame of frosted light, this radiant marvel is a welcome addition to entryways, bedrooms and walk-in closets.

DIMENSIONS

- 26"W x 60"H (660mm x 1524mm)

Width (W)

Depth (D)

Height (H)

Border Width (all sides)
1.50 in., 38 mm

Frost Width

FOG-FREE MIRRORS

Niagara Falls
Ontario, Canada

Acclaim™ Fog-Free Mirror

To create our popular Acclaim™, we merged contemporary design, natural-looking LED lighting, and a highly versatile built-in defogger — making shaving easier than ever and revolutionizing how you experience the shower.

DIMENSIONS

- 11.75″W x 11.75″H (298mm x 298mm)

- 11.75″W x 23.75″H (298mm x 603mm)

- 12″W x 28″H (305mm x 711mm)

Width (W)

Depth (D)

Defogger Area

Height (H)

Border Width
(top/bottom)
1.75 in., 44 mm

Frost Width
1.00 in., 25 mm

Border Width (sides)
1.31 in., 33 mm

Non-Recessed Depth
0.35 in., 9 mm

FEATURES AND BENEFITS

- Lead-free, copper-free, corrosion-resistant OmegaMirror™ glass

- Forward-facing task lighting

- Integrated defogger

- Suitable for wet environments, including showers

- Environmentally sustainable

- Energy efficient

- Fast lead times

- ADA compliant

- 3-year limited warranty

- Made in America with U.S. and global components

LIGHTING SPECIFICATIONS

- Natural-looking LED light color

- CRI: 90+

- CCT: 3,000 Kelvin

- 604 lumens per foot

- Maximum 100 lumens per watt efficacy

- Calculated L_{70} 124,000-hour LED lifespan

SAFETY SPECIFICATIONS

- Entire assembly meets UL/cUL standards

- Defogger serves as safety backing

- Low voltage (12V)

INSTALLATION SPECIFICATIONS

- 120V-240V hardwire electrical connection; provide 36″ whip; junction box not required

- Chassis should be mounted to wall studs; mounting holes are provided

- Controlled by non-dimming on/off wall switch

- Installation wiring may be different on mirrors equipped with additional options

- Fixture can only be hung in the WxH orientation as shown; fixture is not field-interchangeable
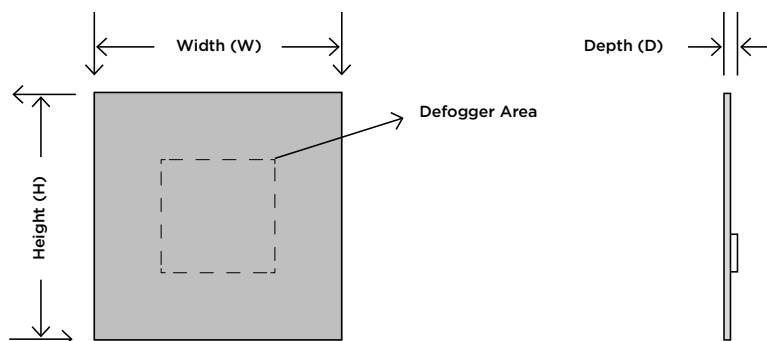

Aqua™ Fog-Free Mirror

Whether it's a quick rinse or a clean morning shave, you'll want to have Aqua™ to do it right. This must-have bathroom companion makes even the simplest shower an experience to behold.

DIMENSIONS

- 11.75″W x 11.75″H (298mm x 298mm)

- 11.75″W x 23.75″H (298mm x 603mm)

FEATURES AND BENEFITS

- Lead-free, copper-free, corrosion-resistant OmegaMirror™ glass

- Integrated defogger

- Suitable for wet environments, including showers

- Environmentally sustainable

- Fast lead times

- ADA compliant

- 3-year limited warranty

- Made in America with U.S. and global components

SAFETY SPECIFICATIONS

- Defogger serves as safety backing

- Low voltage (12V)

INSTALLATION SPECIFICATIONS

- 120V-240V hardwire electrical connection; transformer must be installed in a dry location, not behind mirror and at least 4 feet from wet environment, but within 25' of mirror

- Defogger controlled by on/off wall switch

- Fixture can only be hung in the WxH orientation as shown; fixture is not field-interchangeable
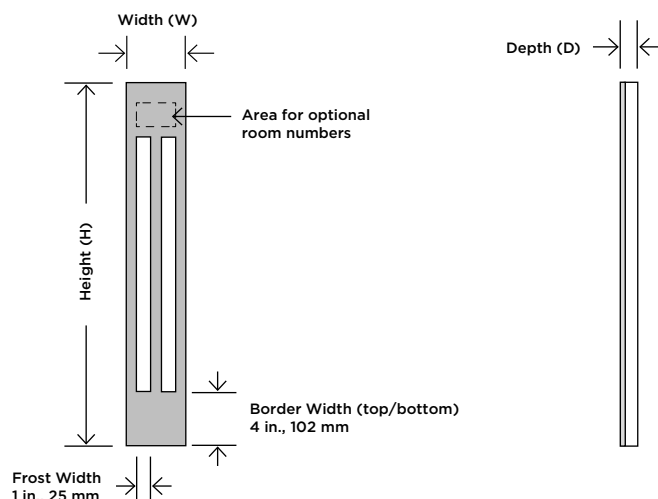

CORRIDOR LIGHTING

Great Wall of China
Beijing, China

Fifth Avenue™ Corridor Lighting

Your corridors will take on the glamour of Fifth Avenue™ with this stunning and functional lighted mirror sconce. Featuring a smooth polished edge with two vertical frames of light, this luminaire is a certain hospitality fashion trend-setter.

DIMENSIONS

• 5"W x 42"H (127mm x 1067mm)

835

FRAMED MIRRORS

CN Tower
Toronto, Ontario

Framed Mirrors

As the world's most experienced provider of high-quality mirrors, we understand many design projects need both lighted mirrors and framed mirrors. That's why in addition to industry-leading lighted mirrors, we also offer an unlimited assortment of non-lit framed mirrors. Whatever your framed mirror needs may be, there isn't a style, size or finish we can't produce[1].

FEATURES AND BENEFITS

- Single-source procurement for lit and non-lit mirrors

- From the world's most experienced mirror company

- Complete customization available

- Unlimited assortment

- Superior quality

- Unmatched workmanship

AVAILABLE OPTIONS

- Metal, wood and polystyrene

- Virtually any profile

- Virtually any texture

- Virtually any color

- Virtually any finish

- Virtually any face width

- Virtually any rabbet size

INSTALLATION SPECIFICATIONS

- Frames come pre-installed on mirrors

[1] Minimum order quantity required.

UVC DISINFECTION

Godafoss Waterfall
Northern Iceland

UVC Mobile Air Purifier 700™

The Mobile Air Purifier 700™ leverages the science of UVC light to reduce the airborne spread of viruses[1]. Designed for round-the-clock operation, it features proven UVC technology, a powerful centrifugal fan, and a high-grade HEPA filter, and can eliminate up to 99.9% of airborne viruses.

FIXTURE

- Dimensions: 18.5"w x 18.5"d x 47.0"h
- Weight: 175 lbs.
- German-engineered 40,000-hour centrifugal fan and motor
- Quiet operation due to optimized airflow design
- Optimized static pressure performance
- Four 4″ multi-directional casters, including a pair of total-lock casters for secure storage
- Durable white powder coated metal construction
- Easy access filter replacement
- Made in America with U.S. and global components

AIRFLOW

- Delivers 6 to 10 Air Changes per Hour (ACH) in 906 ft^2 and 543 ft^2 rooms with 9' ceiling, respectively (at turbo speed) [2]
- Low speed: 15,000 CFH / 250 CFM / 45dB [3]
- Medium speed: 30,000 CFH / 500 CFM / 52dB
- High speed: 45,000 CFH / 750 CFM / 65dB
- Turbo speed: 48,900 CFH / 815 CFM / 67dB

UVC LAMPING

- Two Philips 60-watt 253.7 nm UVC lamps
- Up to 9,000 hours lamp life at 85% UVC intensity
- No ozone emissions

ELECTRICAL

- 120V AC, 50/60Hz
- Low speed: 324 watts / 2.7 amps
- Medium speed: 384 watts / 3.2 amps
- High speed: 516 watts / 4.3 amps
- Turbo speed: 720 watts / 6.0 amps
- 15' hospital grade three-prong power cord (easily replaceable) [4]
- Master full-power on/off switch
- Control buttons and indicator lights for airflow levels

FILTRATION

- High-grade HEPA filter removes 99.97% of particles ≥.300 μm [5]
- Activated carbon filter with pre-filter increases filter life and reduces airborne odors and chemical disinfectant particulates

TECHNOLOGY [6]

- Imbedded computer for Wi-Fi wireless cloud-based control and monitoring
- UVC lamp remote monitoring
- USB upgradeable software input

SOFTWARE [6]

- Cloud-based back-end management
- Easy wireless provisioning
- Programmable start and stop times
- Remote auto on/off
- Room-based operation validation
- Real-time tracking
- Centralized monitoring and control
- Remote software updates
- Lamp monitoring
- Filter end-of-life monitoring

SAFETY

- Auto off switch for lamp replacement
- Auto off switch for afe filter replacement

[1] UVC light has been proven to inactivate various pathogens; the dosage required may vary by pathogen. The UVC Mobile Air Purifier 1800, a larger version of the 700, has been proven effective at eliminating 99.99% of the airborne SARS-CoV-2 virus that causes COVID-19. Visit www.safeology.com for additional information.

[2] ACH calculation: CFH / cubic footage of space. Eg. 48,900 CFH / 8,154 ft^3 room = 6 ACH.

[3] Decibel (dB) comparisons: 40 dB = quite room in home, refrigerator; 50 dB = private office, moderate rainfall; 60 dB = normal conversation, business office; 70 dB =dishwasher, inside running car.

[4] Fixture not compatible with Ground-Fault Circuit Interrupter (GFCI) outlet.

[5] Based on the filter manufacturer's specifications.

[6] Available with annual service plan, sold separately.

UVC Mobile Air Purifier 1800™

Delivering 6 to 10 air changes per hour, the Mobile Air Purifier 1800™ offers the CDC-recommended standard for effective air cleaning. Designed by lighting technology experts, it harnesses the power of UVC light and HEPA filters to reduce up to 99.9% of viruses in the air[1].

FIXTURE

- Dimensions: 26.0"w x 25.5"d x 48.0"h
- Weight: 265 lbs.
- German-engineered 40,000-hour centrifugal fan and motor
- Quiet operation due to optimized airflow design
- Optimized static pressure performance
- Four 4″ multi-directional casters, including a pair of total-lock casters for secure storage
- Durable white powder coated metal construction
- Easy access filter replacement
- Made in America with U.S. and global components

AIRFLOW

- Delivers 6 to 10 Air Changes per Hour (ACH) in 2,000 ft[2] and 1,200 ft[2] rooms with 9' ceiling, respectively (at turbo speed) [2]
- Low speed: 30,000 CFH / 500 CFM / 46dB [3]
- Medium speed: 60,000 CFH / 1,000 CFM / 58dB
- High speed: 90,000 CFH / 1,500 CFM / 64dB
- Turbo speed: 108,000 CFH / 1,800 CFM / 72dB

UVC LAMPING

- Two Philips 60-watt 253.7 nm UVC lamps
- Up to 9,000 hours lamp life at 85% UVC intensity
- No ozone emissions

ELECTRICAL

- 120V AC, 50/60Hz
- Low speed: 517 watts / 4.4 amps
- Medium speed: 864 watts / 7.4 amps
- High speed: 952 watts / 8.0 amps
- Turbo speed: 1,410 watts / 11.8 amps
- 15' hospital grade three-prong power cord (easily replaceable) [4]
- Master full-power on/off switch
- Control buttons and indicator lights for airflow levels

FILTRATION

- High-grade HEPA filter removes 99.97% of particles ≥.300 μm [5]
- Activated carbon filter with pre-filter increases filter life and reduces airborne odors and chemical disinfectant particulates

TECHNOLOGY [6]

- Imbedded computer for Wi-Fi wireless cloud-based control and monitoring
- UVC lamp remote monitoring
- USB upgradeable software input

SOFTWARE [6]

- Cloud-based back-end management
- Easy wireless provisioning
- Programmable start and stop times
- Remote auto on/off
- Room-based operation validation
- Real-time tracking
- Centralized monitoring and control
- Remote software updates
- Lamp monitoring
- Filter end-of-life monitoring

SAFETY

- Auto off switch for lamp replacement
- Auto off switch for filter replacement

[1] UVC light has been proven to inactivate various pathogens; the dosage required may vary by pathogen. The UVC Mobile Air Purifier 1800 has been proven effective at eliminating 99.99% of the airborne SARS-CoV-2 virus that causes COVID-19. Visit www.safeology.com for additional information.

[2] ACH calculation: CFH / cubic footage of space. Eg. 48,900 CFH / 8,154 ft[3] room = 6 ACH.

[3] Decibel (dB) comparisons: 40 dB = quite room in home, refrigerator; 50 dB = private office, moderate rainfall; 60 dB = normal conversation, business office; 70 dB =dishwasher, inside running car.

[6] Available with annual service plan, sold separately.

UVC Upper Room Linear Recessed Fixture™

The Upper Room Linear Recessed Fixture™ continually disinfects the air, using UVC technology that's been proven to remove up to 99.9% of viruses[1]. Providing both an effective way to reduce airborne virus transmission, as well as a sleek, unobtrusive design, it's the ideal product when form and function are of equal importance.

FIXTURE

- Dimensions (visible): 47.00"w x 6.00"d x 1.55"h
- Dimensions (recessed): 47.70"w x 6.75"d x 2.45"h
- Weight: 25 lbs.
- Silent operation
- Easy lamp replacement
- Made in America with U.S. and global components

AIRFLOW

- Single unit is effective for an average 400 ft^2 / 3,600 ft^3 space (20' x 20' x 9'
- UVC dosage calculated upon average air flow in a typical room with HVAC

UVC LAMPING

- Philips 30-watt 253.7 nm UVC lamp
- Up to 9,000 hours lamp life at 85% UVC intensity
- No ozone emissions

ELECTRICAL

- 120-277V AC, 50/60Hz, .25/.10 amps
- 30 watts
- Hard-wired

SAFETY

- Suitable for areas where bottom of fixture can be mounted at least 9'6" above finished floor; fixture may be lowered to 8'10" when opposing wall parallel to light source is less than 25' from fixture. Fixture may be lowered to 8'4" when opposing wall is less than 14.5' from fixture. See Installation and Operation Manual for additional details.
- PIR auto-off sensors to protect against accidental UVC exposure
- Auto-off switch for lamp replacement
- Louvered design for operation in occupied space
- Complies with IEC 62471 Photobiological Safety of Lamps and Lamp Systems

CERTIFICATIONS

- EPA-registered manufacturing facility
- Certified to UL Standards
- Patent pending

SUPPORT

- 3-year warranty
- Field service
- Technical support

[1] UVC light has been proven to inactivate various pathogens; the dosage required may vary by pathogen. Visit www.safeology.com for additional information.

UVC Upper Room Linear Wall Fixture™

Utilizing natural air circulation to move contaminated air into the Upper Room Disinfection Zone, the Upper Room Linear Wall Fixture™ inactivates up to 99.9% of airborne viruses using the proven power of UVC light[1]. And with a minimalistic design that makes it barely noticeable, the focus will be on the air, not the fixture.

FIXTURE

- Dimensions: 48.81"w x 7.88"d x 1.63"h

- Weight: 22 lbs.

- Silent operation

- Easy lamp replacement

- Made in America with U.S. and global components

AIRFLOW

- Single unit is effective for an average 400 ft^2 / 3,600 ft^3 space (20' x 20' x 9')

- UVC dosage calculated upon average air flow in a typical room with HVAC
